Hi Marta,

Please share my statement in its entirety:

We work tirelessly to provide every child with proper care, both in our in-school programs and in our aftercare program. Our aftercare program is open to all students, and students with Individualized Education Plans (IEPs) regularly participate. The fact is Bricolage Academy is open to all children and we accept all students in aftercare. No matter the time of day our goal is always to provide the best care for our students, their safety is paramount to an environment in which they can socialize, learn and thrive after school. One of the biggest values of our after school program is for low income parents, and providing a safe and healthy environment for these children is an important focus of our mission. Whether or not a student has an IEP, every child in our day or after school program is properly cared for and nurtured.
